PERSONAL DETAILS

Unsolved problem makes me get out of the bed in the dawn which tells that I am a self-driven person and therefore I can generate good performance to the company. I developed my coding skills because of the willingness and commitment I have towards my work every single time.

Another reason is because I'm fast learner. "I have thought many students before, and I can tell you this, you are a fast learner." Quoted from my first programming teacher Mr. Paul Kihara – CEO of [Nariphon Technologies LTD](#) in 2017.

I enjoy participating in team work which gives me a chance to hear and share my views towards solving certain problem. I will be good addition to the team.

I am well versed in VB.NET and I have couple Enterprise Systems individually and others in a team which helped me to gain knowledge on how business oriented systems work. Therefore, working and understanding your ERP systems that you have will be easier.

I also have a good understanding of PHP & Laravel Framework and have done some projects using the tools which I have shared my github repos.

My objective is to add a real commercial value within once given a chance.

SKILLS

- ✓ PHP|Laravel development
- ✓ .NET development
- ✓ Web Design (HTML|CSS|JS, UX)
- ✓ Advanced knowledge in VB.NET

EDUCATION

2015-PRESENT : CHUKA UNIVERSITY

DEGREE IN BACHELORS OF APPLIED COMPUTER
SCIENCE

2011-2014

:

CARDINAL OTUNGA HIGH SCHOOL MOSOCHO

KENYA CERTIFICATE OF SECONDARY EDUCATION

GRADE ATTAINED B (63 POINTS)

WORK EXPERIENCE

2017- PRESENT: NARIPHON TEVHNOLOGIES (*nariphontechnologies.com*)

Worked as a Junior Software Developer at Nariphon Technologies LTD. I gained a lot experience both in software engineering concepts and database design. I was able to participate in some systems like POS, School System and some Hospital System Modules. I was also assigned to design and develop a complete Coffee Farmers Management System which was used in certain company.

I have also developed Web Application (E-Counseling) for my school (Chuka University)-which is yet to be deployed officially, using PHP & LARAVEL, which is aimed at counseling the students through live chat and blog posts.

INTRESTS

Watching Documentaries. - Documentaries are well detailed research reports in form of videos which are informative. I'm passionate in research work and good content delivery.

Photography – It comes through the idea of documenting, my life. I prefer documenting verses creating because documenting is pretty easy it's just showing me my journey on the things I'm working on verses creating which is time intensive.

Talking/Giving Motivations – My life has been motivated by the people that came into my life and I also desire to make other people's life better by supporting, motivating through the word of mouth and helping where I can. And even if I'm not able at that time, I do not quit.
